(54) GRAVURE COATING DOCTOR BLADE AND GRAVURE COATING USING THE SAME

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a gravure coating method not generating coating trouble over a long period of time from the beginning.

SOLUTION: In a gravure coating method supplying a coating soln. to the surface of a gravure roll and pressing a doctor blade to the surface of the gravure roll to remove the excessive coating soln. and subsequently transferring the coating soln. in a gravure cell to a recording material, the doctor blade 2 wherein the edge is formed by allowing an under surface to retreat with respect to an upper surface and the edge angle is $35-80^\circ$ is used and the difference between the tangential line of the doctor blade 2 on the surface of the gravure roll and the angle of the edge of the doctor blade is set to a range within $\pm 10^\circ$ to remove the excessive coating soln. to perform coating.
